Ziebart

A Name Your Car Can Live With

Salt, rain and humidity attack every part of a car—in places you can see and places you can't. These harmful elements slowly eat away the metal components of your vehicle and cause rust.

There are over 250 square feet of sheet metal in your car. All of this is prone to rust. Ziebart uses over 2 gallons of sealant to coat all the critical areas including the underside. Most car dealers use only 1 quart.

Today's unibody cars have hidden areas vulnerable to rust. Over 3,000 spot welds need protection. Outer body sheet metal is thinner. And boxed-in sections and seams on today's cars can require special protection.

Ziebart protects areas carmakers, car dealers and other rustproofers ignore. Ziebart rust protection protects the entire car, including 24 critical areas not covered by new car warranties.

Through extensive research and development, Ziebart has created the finest Rust Protection for today's advanced car designs. Ziebart's engineers and certified technicians analyze and create individual specifications for every make and model, foreign and domestic.

Rust Protection

Ziebart Rust Protection uses a unique new sealant which actually penetrates seams and crevices, "creeping" into hidden areas where rust starts. This exclusive high-tech coating is applied with directional spray tools to insure protection where it is needed most.

Sound Deadener

Ziebart Sound Deadener is applied to the entire underside of your vehicle before any dirt has a chance to accumulate. This thick, abrasion-resistant coating reduces road noise by up to 60%. Not only does this control underside corrosion and chipping, but it means a much quieter, more enjoyable ride for you...better stereo sound, less road fatigue, and easier conversation.

Fabric Protection

Ziebart Fabric Protection is a clear penetrant that actually penetrates each individual upholstery fiber, repelling and insulating it from all water and oil-based stains for as long as you own your car. In addition, this coating prevents dirt from matting down the fibers, maintaining the fabric's original look and suppleness longer.
